Winchester	10,604	0	0	0	0	222	0.5	7/11/2021	7/24/2021	7/29/2021

* “Percent positivity is calculated as the number of positive tests among community residents conducted during the 14 days divided by the total number of positive and negative tests among community residents during the same period. If someone was tested more than once during that 14-day period, then those multiple test results (regardless of whether they were positive or negative) are included in the calculation.”

Data updates on testing in Connecticut

The following is a summary of the day-to-day newly reported data on cases and tests in Connecticut. It is important to note that these newly reported updates include data that occurred over the last several days to a week. All data in this report are preliminary, and data for previous dates will be updated as new reports are received and data errors are corrected.

Overall Summary	Total	Change Since 8.3.2021
COVID-19 Cases (confirmed and probable)	356,701	+537
COVID-19 Tests Reported (molecular and antigen)	9,992,815	+16,037
Daily Test Positivity	--	3.35%
Patients Currently Hospitalized with COVID-19	163	-2

Data on COVID-19 associated deaths is updated once per week every Thursday. The most recently reported total number of deaths is 8,293. County-by-county breakdown of current COVID-19 hospitalizations:

County	Current COVID-19 Hospitalizations
Fairfield County	40
Hartford County	45
Litchfield County	1
Middlesex County	6
New Haven County	52
New London County	17
Tolland County	2
Windham County	0
Total	163
